

Note for Casio Software

Allowing installation of Casio drivers

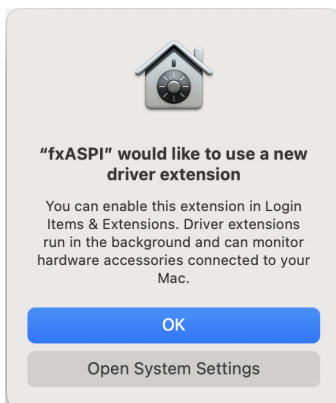

Relevant Software

- CAS color graphic OS Update
- fx-CG100/GRAPH MATH+/fx-1AU GRAPH OS Update
- fx-CG50 Series/GRAPH90+ E OS Update
- Screen Receiver

To Install Software

- (1) Double-click the pkg file of the software to install.
- (2) Follow the instructions in the window until the following pop-up appears.

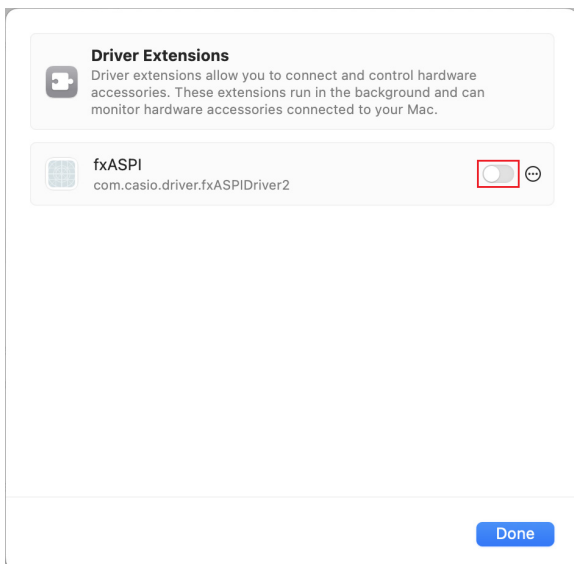

*The pop-up appearance and messages may differ depending on the macOS version.

- (3) Click "Open System Settings" to go to the System Settings. Enable "fxASPI".

* The transition destination in the System Settings may differ depending on the macOS version.

- macOS 15: "Driver Extensions" within "Login Items & Extensions" in "General"
- macOS 13-14: "Security" in "Privacy & Security"
- macOS 12 or earlier: "General" in "Security & Privacy"

- (4) Go back to the software installer window and proceed with the installation by following the instructions in the window.

* If one of the problems below occurs after installation, they can be resolved by performing the above procedure again.

- Updating the calculator fails after installation
- Screen Receiver fails to send the calculator window to PC
